

SANITISER SENTINEL®

Sanitiser Sentinel has been designed to attract and encourage people to use hand sanitiser stations and soap dispensers.

The Sentinel uses a Passive Infrared (PIR) sensor to detect people passing a sanitiser station. When the sensor is activated a voice message is played and lights flash to highlight the dispenser.

An audible reminder to wash or sanitise hands will reinforce Infection Prevention and Control protocols in any environment, without the need for staff to be present.

Sanitiser Sentinel will help safeguard your patients, staff and customers against Coronavirus and other viral or bacterial infections.

Reinforces Infection Prevention & Control Procedures

Sanitiser Sentinel can be placed above or close to any existing dispenser

Sanitiser Sentinel Features

PIR Sensor

Speaker

Approx Size: 140(H)x95(W)x55(D)mm

Internal or SD Card Select Switch

Sound Select Button

Sound ON-OFF Switch

Lights ON-OFF Switch

Battery Door (Requires 4x C Batteries)

Wall Mounting Holes

Power ON-OFF Switch

Micro SD Card Slot (For custom sounds and messages)

Volume Control Slide Switch

5x Flashing LED Lights (Select ON or OFF)

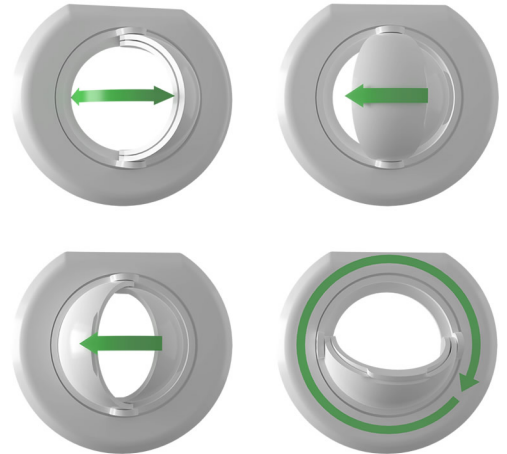

IRIS Accessory (Included & Optional)

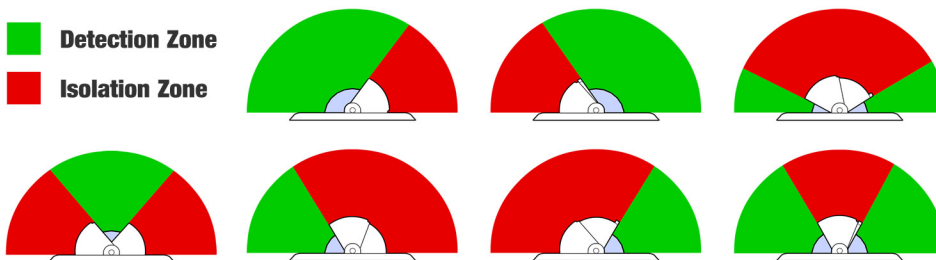

The IRIS is a unique, patented accessory for the Sanitiser Sentinel. It has been designed to allow full adjustment of the detection and isolation zones.

The multi-rotational design gives an infinite amount of ways to customise how the sensor detects or isolates specific areas, providing optimal performance for all installations.

IRIS Accessory (Attaches with self-adhesive pad)

Green Detection Zone
Red Isolation Zone

The isolation shields can be positioned in the left, right or central position. The outer shield can be opened to increase the area.

The shields can also be separated to isolate both sides or rotated to make the sensor pet or child friendly.

20 pre-recorded languages, plus options to add your own custom messages

26 pre-recorded messages, including 20 different languages and 3 musical alert tones. Optional languages include German, French, Spanish, Italian, Polish, Dutch, Portuguese, Czech, Hungarian, Slovak, Chinese and Hebrew. The SD Card feature also allows you to store and play your own custom voice messages.

Sanitiser Sentinel is powered by 4x C type batteries which provide over 200,000 operations when in voice and light combination mode. For the average installation this is the equivalent of 5 years. 400,000 operations can be achieved in voice only mode or light only mode.
