

DefibSafe3 DS3 cabinet

A NEW GENERATION OF
DEFIBRILLATOR STORAGE

The DefibSafe3 DS3 cabinet

SUITABLE FOR EXTREME
OUTDOOR ENVIRONMENTS

AED storage solution

KEY FEATURES

TECHNOLOGY

- Temperature management system to maintain optimum performance of AED and management of Battery & Pads.
- Digital coded entry for secure access
- Anti-UV material casing for protection of AED

SAFETY

- Protects AED from external factors including environmental/temperature change
- Durable ABS & Polycarbonate (PC) design to protect against corrosion
- High impact resistance and industry leading **IP66 rating**

CONVENIENCE

- Vertical access allows quick AED access
- Outer LED lights provide ease of location in day and night
- Elegant, minimalist design, compatible with most AED market brands

TEMPERATURE MANAGEMENT SYSTEM

The in-built system keeps the internal temperature stable - to prevent deterioration of the electrode pad gel on the defibrillator unit. Electrode pad gel on the dual adult/paediatric disposable electrode pads.

PERFECT PARTNERS

Our innovative DS3 cabinets seamlessly integrate with iPad devices, transforming them into powerful command centres during critical moments. Access clear instructions, monitor vitals in real-time, and transmit data to medical professionals – all from the secure protection of your DS3 defibrillator cabinet. Upgrade your response and redefine emergency care by adding the iPad to your defibrillator solution.

iPAD SPR
Defibrillator

iPAD NFK200

iPAD SPR – For when every second counts

Introducing the iPAD SPR, the AED that redefines life-saving response. Built tougher, smarter, and ready for anything with its class-leading IP66 rating – highly water resistant in rugged and hazardous environments. Its intuitive design guides you clearly when providing aid, while real-time data and ECG recording is logged for up to five events. Offering Adult/Child mode and dual use quick-access adult/child pads, the iPAD SPR is quickly becoming the gold standard of advanced and intuitive public access AEDs.

The simple, compact hero of the iPAD family

The newest model of the iPAD series public access AED. The NFK200 is an affordable compact system, ideal for a wide range of business looking to add a defibrillator on their premises. Its rugged casing caters for use in all conditions. Offering Adult/Child mode and dual use quick-access adult/child pads, the NFK 200 allows anyone, regardless of training, to take control in critical moments.
