

GL899 Blue Nitrile Powdered™

The GL899 Blue Nitrile Powdered™ is a powdered nitrile disposable glove offering protection against contamination, dirt and potential irritants in low risk situations. The nitrile synthetic rubber that is used to manufacture the GL899 contains none of the proteins that are present in natural rubber eliminating protein sensitisation. Lightly powdered, it eases donning and absorbs perspiration. With textured fingertips for improved grip, it is extremely soft and pliable yet still maintains a tensile strength that is comparable to natural rubber. The cuff is beaded, enhancing strength and preventing liquid roll back. The GL899 Blue Nitrile Powdered™ has an AQL rating of 4.0 and has been tested in accordance with EN1186 making it suitable for food contact.

Typically used for:

- Food Processing • General Assembly
- Local Authority Work
- Light Duty Maintenance
- Painting and Decorating
- Automotive Maintenance & Repair

Case Quantity:

100 gloves per dispenser
10 dispensers per case

For Minimal Risks Only
