- Many children suffer from eczema, and suffering itching and discomfort at their hands. These super soft children's gloves, which are made from health-friendly and biodegradable bamboo, will prevent the child from scratching directly on eczema / wounds, keeping the cream that is used in the treated area to last longer.
- We have been working especially to develop gloves with a tailored fit for children, and therefore offer the gloves in five child sizes. This is so that children should experience as few inconveniences as possible while using the gloves at play and other activities, or during the night.
- The gloves are made of health and environmentally friendly, biodegradable bamboo.
- The gloves can be washed at 60 °C and will keep their good qualities wash after wash.

The descriptions, characteristics, applications and photos are given for information purposes and do not constitute a contractual commitment. The manufacturer reserves the right to make any modifications deemed necessary.
