

# CONTIPLAN<sup>+</sup>

Reduce costs, improve resident experiences & operational efficiencies with Contiplan

7-in-1 advantages

Our Contiplan All-in-One Contenance Care Cloths have been used in a recent study across 4 sites of one of the UK's largest providers of nursing and residential care, and we're excited to share the results with you.

**Resident experience: improvements in skin integrity of up to 49%\***, promoting health and well-being and reducing the risk of developing Incontinence Associated Dermatitis (IAD) and pressure sores. A more efficient process of improving resident comfort and reducing distress during continence care episodes.

**Cost savings: consumables cost reduced by up to 40%†** by reducing the total number of products used and the number of wipes per episode, compared with traditional continence care regimen. Additional savings generated by reduced laundry costs in both energy and laundry consumables.

**Operational benefits: simplified process released staff time back into care equivalent to 1 full time member of care staff per home, per year‡** easing staffing pressures and boosting staff morale. The reduced number of products will support better process compliance, product rationalisation and storage issues.
