

Aprons & Smocks

Aprons (Flat Packed)

Thicker than our standard aprons and available in poly packs for dispensing requirements, these aprons are the perfect choice in a wide range of industries where you need a degree of extra protection from spills, germs and dirt. A more robust material means more peace of mind, and it also gives you the opportunity to work without the physical restrictions caused by worrying about snagging or tearing your protective apron – one more way to improve safety for your staff, patients or customers.

We've even thought of your everyday convenience when it comes to dispensing, so these aprons come flat packed to help suit any dispensing requirement.

- Designed for single use, these heavy duty aprons offer a high level of hygiene appropriate for many industries
- Resistant to liquids for preventing fluid transfer, which makes them perfect for catering, cleaning, dentistry, first aid and medical procedures
- CE category: Cat 1 Minimal Risks
- Packed in poly bags (10x100) to suit your dispensing requirements
- 16mu, and ties around the back for convenience

Our Aprons are an excellent choice for work in the following sectors:

- Food processing industry
- Care sectors
- Hospitals, medical and healthcare
- Cleanroom
- Janitorial
- Laboratories
- Pharmaceutical
- Contamination control
