We've Recycled Over 120 Million Plastic Bottles!

Our eco-friendly recycled plastic furniture range can help save 1,000's of plastic bottles from entering landfill. In fact, 1kg of material is derived from 28 2-litre HDPE plastic bottles. Look for this symbol to see how many bottles are saved for each piece of furniture.

We are extremely proud that sales of our products have recycled over 120 million bottles so far!

Why Choose Recycled?

The Features and Benefits

The benefits of recycled plastic significantly outweigh traditional timber. Considering both financial and environmental factors, recycled plastic is considerably superior to its timber or metal equivalents.

As we all know, the amount of plastic waste each year is staggering, and our eco-friendly recycled plastic furniture range can help save thousands of milk bottles from entering landfill.

We manufacture all our products from 100% Recycled High-Density Polyethylene (HDPE), typically used to manufacture everyday products such as water bottles, plastic bags, and bottle lids. When recycled, it is an extremely hardwearing, versatile material, making it a perfect choice for all-weather outdoor furniture. It has a significantly lower carbon footprint than timber or metal equivalents, using less energy and water and emitting lower levels of CO₂ in its production.

STEP 1

High-Density Polyethylene (HDPE) plastic bottles destined for landfill are collected

STEP 2

The recycled plastic is broken down into granules at the reprocessor where it has been washed and cleaned

STEP 3

The broken down granules are transformed into our strong and robust recycled plastic furniture
